

GaelForce UCD

VEX U Robotics Sponsorship Deck

Introduction

Who are we?

GaelForce UCD is Ireland's **first and only VEX U team**. The team brings together students from various backgrounds with one goal: competing against the world's best at the **VEX Robotics World Championships** - the largest robotics competition in the world.

The Competition

VEX U Robotics

VEX U is the university tier of the **VEX Robotics Competition** - the largest robotics competition in the world. In the competition, student-led teams must design, build, and program robots to compete in a new challenge that is released annually.

The Competition

How it works

Every year, the VEX U challenge resets, pushing us to design and build entirely new robots from scratch.

- **A New Game Every April:** A fresh challenge is released annually. We have just a few months to reverse-engineer the rules, design, and program a new setup.
- **The Robots:** VEX U teams must build two distinct robots that work together. We use custom 3D-printed parts, CNC-machined components, and advanced sensors.
- **Game Elements:** Matches take place on a square field where robots interact with objects (like discs, balls, or mobile goals) and navigate obstacles like climbing structures.
- **Match Format:** High-intensity 2-minute matches consisting of an autonomous coding phase followed by a fast-paced, driver-controlled strategy phase.

The Competition

How it works

Every year, the VEX U challenge resets, pushing us to design and build entirely new robots from scratch.

Match Format

University alliances face off in high-pressure, 2-minute 2v2 matches. After scouting the opposition's design and strategy to plan their counter-play, a team of drivers, human players, and strategists takes the field. The game begins with a fully programmed autonomous period, before transitioning to a fast-paced driver-controlled phase where teams must defend, attack, and complete tasks to outscore the opponent.

Game Elements

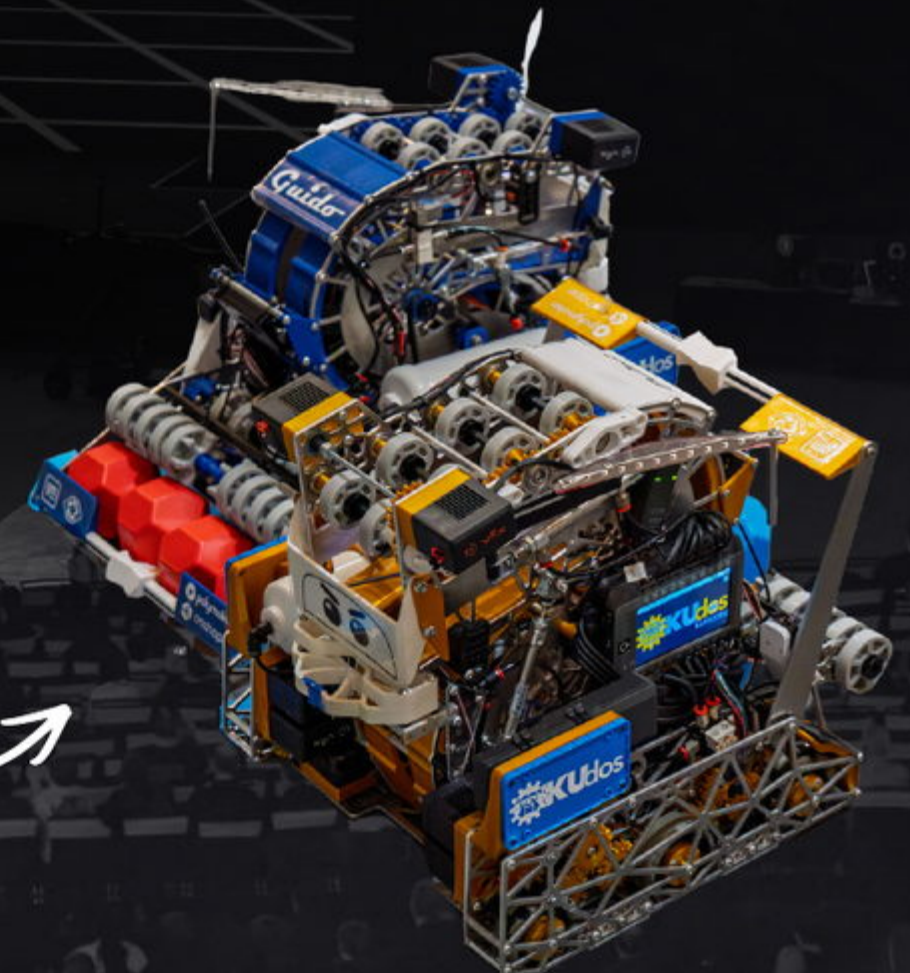

Matches take place on a square field where robots interact with objects (like discs, balls, or mobile goals) and navigate obstacles like climbing structures.

This year's game involves stacking these cone-like structures.

The Robots

VEX U teams must build two distinct robots that work together. We use custom 3D-printed parts, CNC-machined components, and advanced sensing.

Cost Breakdown

To compete at the highest level this year, we anticipate a total budget of €20,000 to €25,000, which is directly allocated across three major costs:

Travel & Logistics

Our biggest expense will be covering transport, accommodation, and registration fees for the team and robots as we travel to international competitions.

Custom Manufacturing & Materials

Sourcing raw metals, plastics, and hardware, alongside funding the precision CNC-machining, waterjet cutting, and advanced 3D printing needed to fabricate our custom components.

Off-the-Shelf Parts

Sourcing control system electronics, motors, sensors, and official VEX hardware to keep the robots legal and competitive.

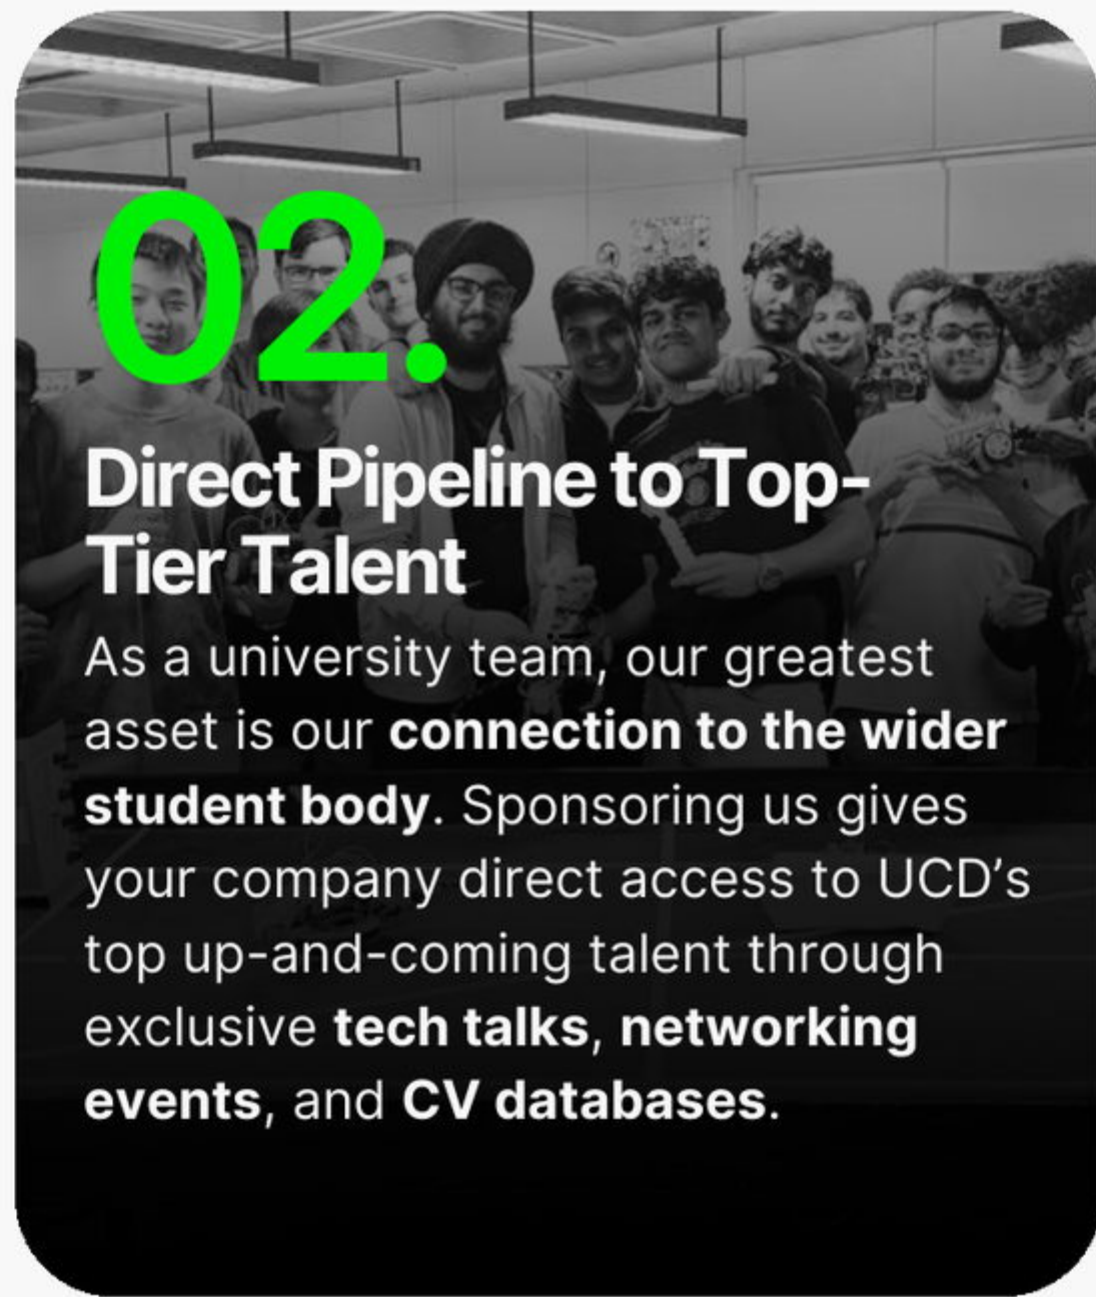

Why Support Us?

A black and white photograph of two young men looking down at something off-camera. The number "01." is overlaid in large green font.

01.

Empowering Ireland's Future Engineers

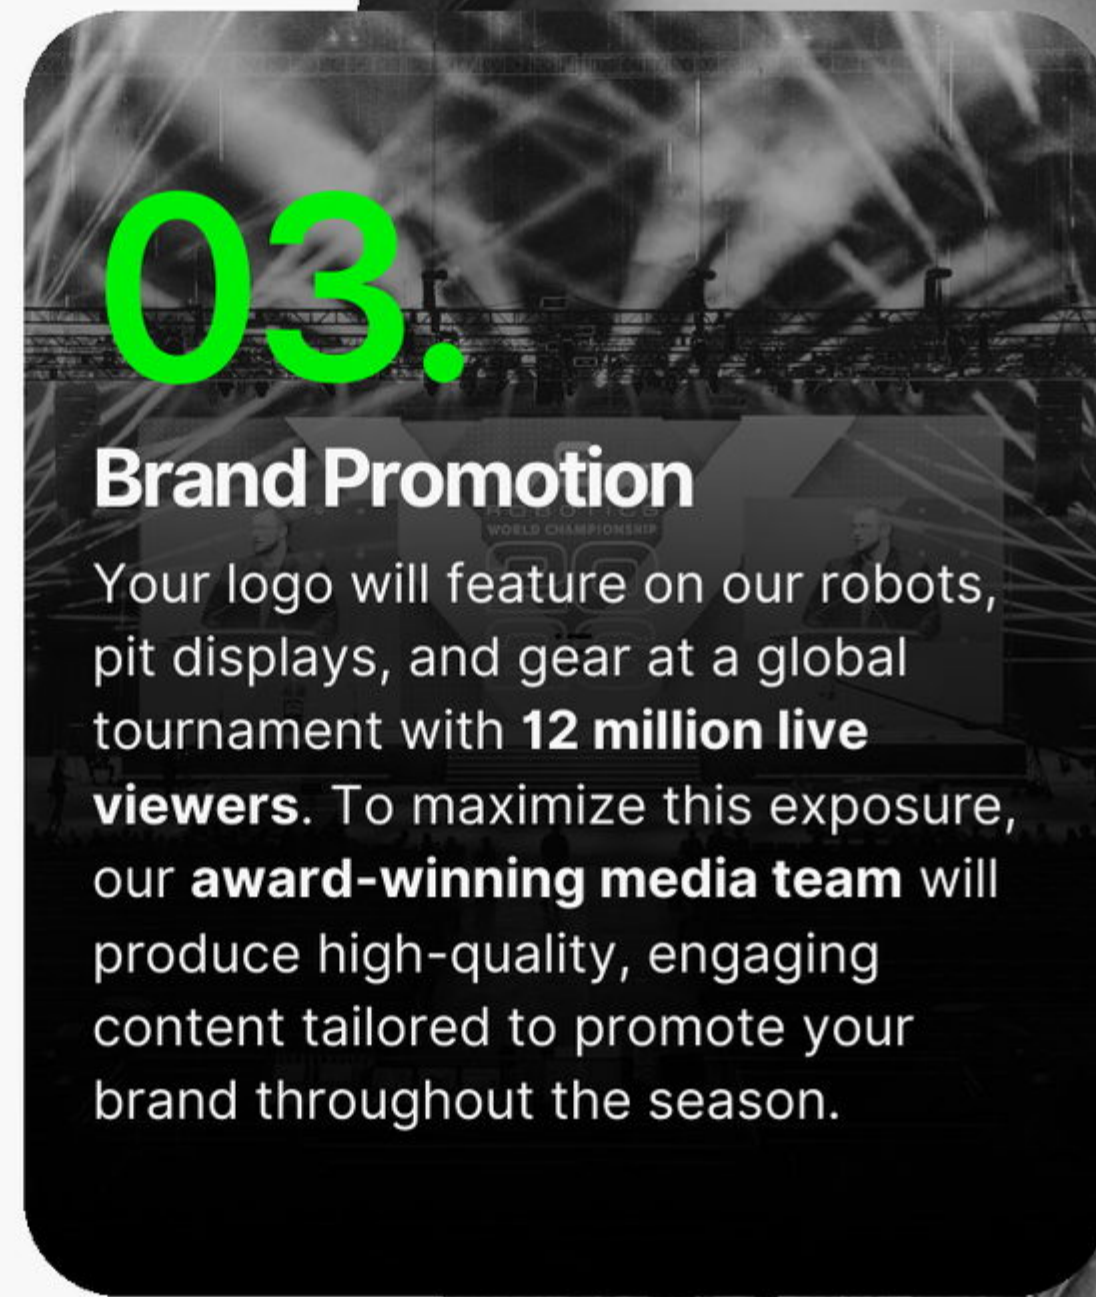

As **Ireland's first VEX U team**, your support puts Irish engineering talent on the global stage, proving we can compete with the world's best. Your investment also funds our **secondary school mentorship**, building the future.

A black and white photograph of a group of young men standing together and smiling. The number "02." is overlaid in large green font.

02.

Direct Pipeline to Top-Tier Talent

As a university team, our greatest asset is our **connection to the wider student body**. Sponsoring us gives your company direct access to UCD's top up-and-coming talent through exclusive **tech talks, networking events**, and **CV databases**.

A black and white photograph of a large crowd of people at a tournament. The number "03." is overlaid in large green font.

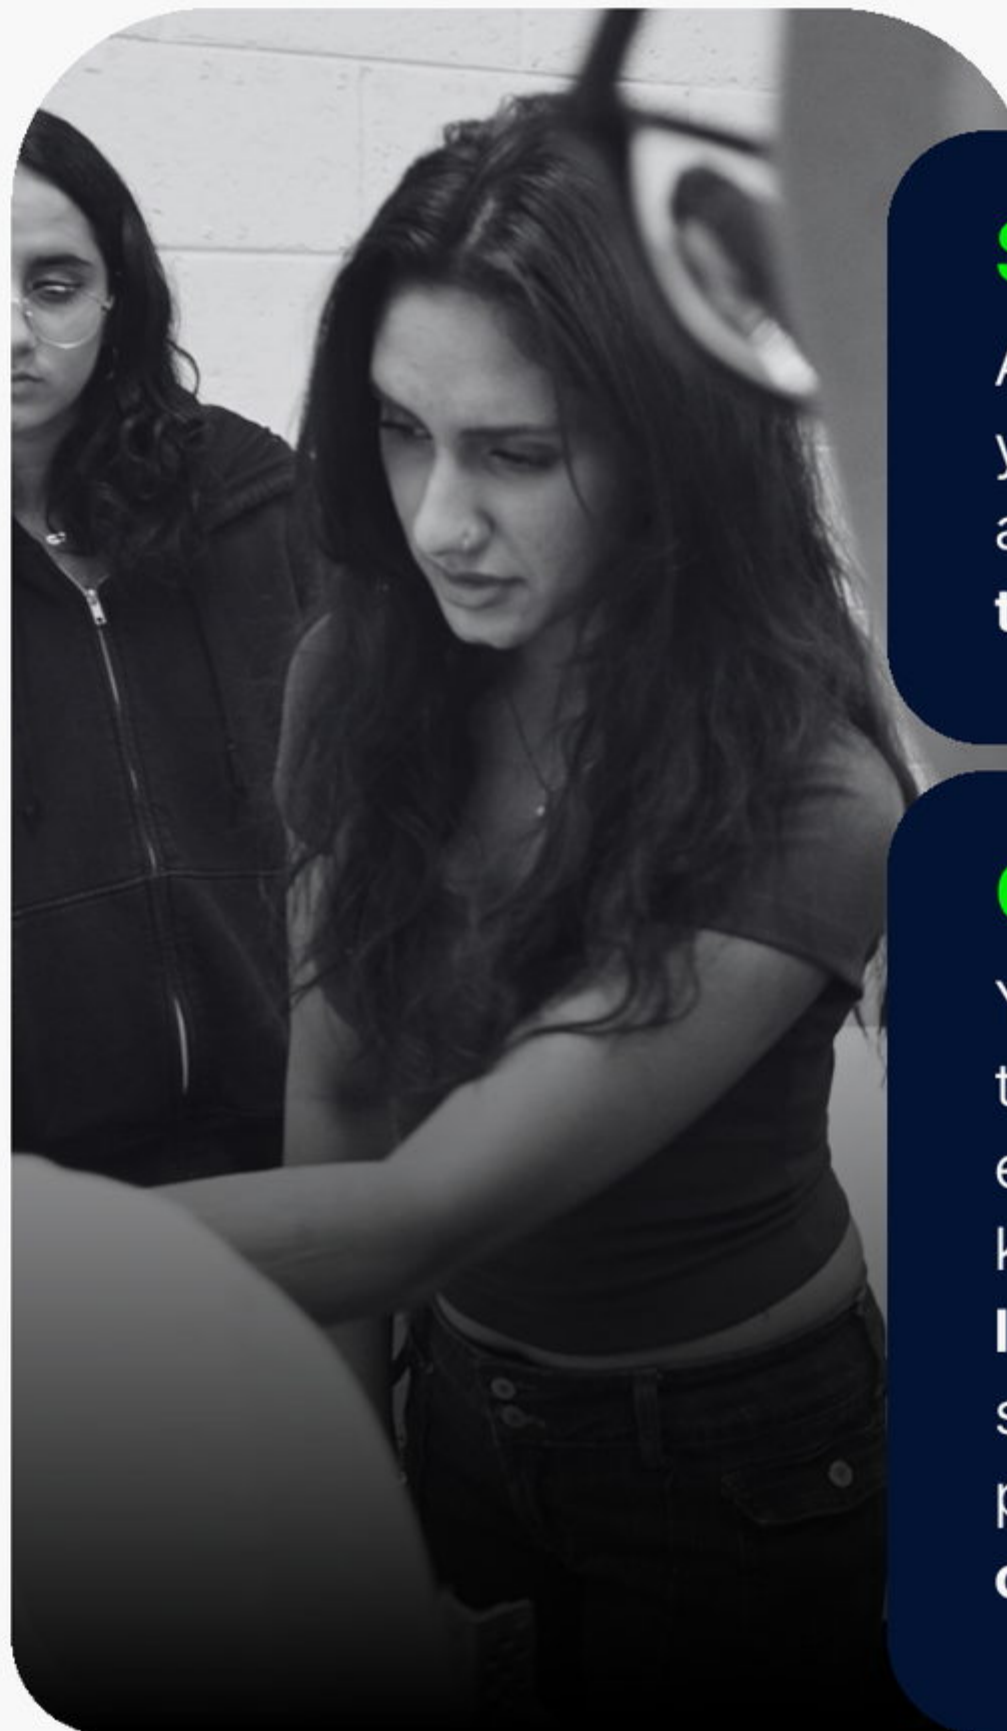

03.

Brand Promotion

Your logo will feature on our robots, pit displays, and gear at a global tournament with **12 million live viewers**. To maximize this exposure, our **award-winning media team** will produce high-quality, engaging content tailored to promote your brand throughout the season.

Building the Future

Supporting Irish Engineering

As Ireland's first ever VEX U team, your investment put Irish engineers among the world's best for the **first time in VEX history**.

Our Mentorship Efforts

Your investment also supports our team members' extensive mentorship efforts, which spans from introducing kids to LEGO robots to coaching the **Irish national robotics team** for secondary schools. Looking ahead, we plan to expand this impact by **hosting our own VEX competitions** in UCD.

Direct Connection to the Future of Irish Tech

As a university team, our greatest asset is our direct connection to the wider student body. **Sponsoring us gives your company early, exclusive access to UCD's top up-and-coming talent before they even hit the job market.** Through targeted **tech talks, networking events**, and direct **CV databases**, you can fast-track your recruitment and connect with highly motivated students across engineering, software, and finance.

Global Brand Exposure

Sponsoring us puts your logo front and centre on our robots, gear, and pit displays at a global tournament with **12 million live viewers**. To back this up, our media team - made up of award-winning cinematographers, designers, and content managers whose work has aired on international news - will produce sharp, professional media throughout the season to showcase your brand.

Sponsorship Packages

The image for the Bronze package shows a VEX Robotics World Championship 2026 logo and a person in a field. A brown ribbon is at the top.

Bronze
€500+

The image for the Silver package shows a crowd of people at an event. A grey ribbon is at the top.

Silver
€1,000+

The image for the Gold package shows a VEX Robotics World Championship 2026 logo and a person in a field. An orange ribbon is at the top.

Gold
€2,500+

The image for the Emerald package shows a VEX Robotics World Championship 2026 logo and a person in a field. A green ribbon is at the top.

Emerald
€5,000+

The image for the Diamond package shows a VEX Robotics World Championship 2026 logo and a person in a field. A blue ribbon is at the top.

Diamond
€10,000+

*we also have a custom package for sponsorships that don't fit into these categories or for specific requests

Bronze Package

The Bronze package is for sponsorships of above €500. It contains the following features -

- **CV Database** - Your company will get access to the resumes of top-performing UCD students across a variety of academic backgrounds for recruitment.
- **Logo Placement** - Your company's logo will feature on our team gear and website, scaled appropriately alongside our higher-tier partners.
- **Newsletter** - Our team will keep your company updated on our progress and major milestone with a regular newsletter.
- **Social Media Post** - Our media team will make a social media post including your company's name, logo and some brief details about the company on our social media pages.

Silver Package

*this package comes with all the features in the previous package.

The Silver package is for sponsorships of above €1,000. It contains the following features -

- **Short-Form Promotional Video** - Our media team will create a short form promotional video - sharing some details about your company and its work etc. and thanking you for your support.
- **Logo Placement** - Your company's logo will feature on our team gear and website, more prominent than the previous package.
- **Coupons + Creator Codes** - If requested, we will distribute custom discount codes or coupons through targeted video content and campus posters to drive traffic straight to your site.
- **Written Blog Posts** - Our team will feature a dedicated article about your company on our website, giving our visitors a direct way to learn more about your business and values.

Gold Package

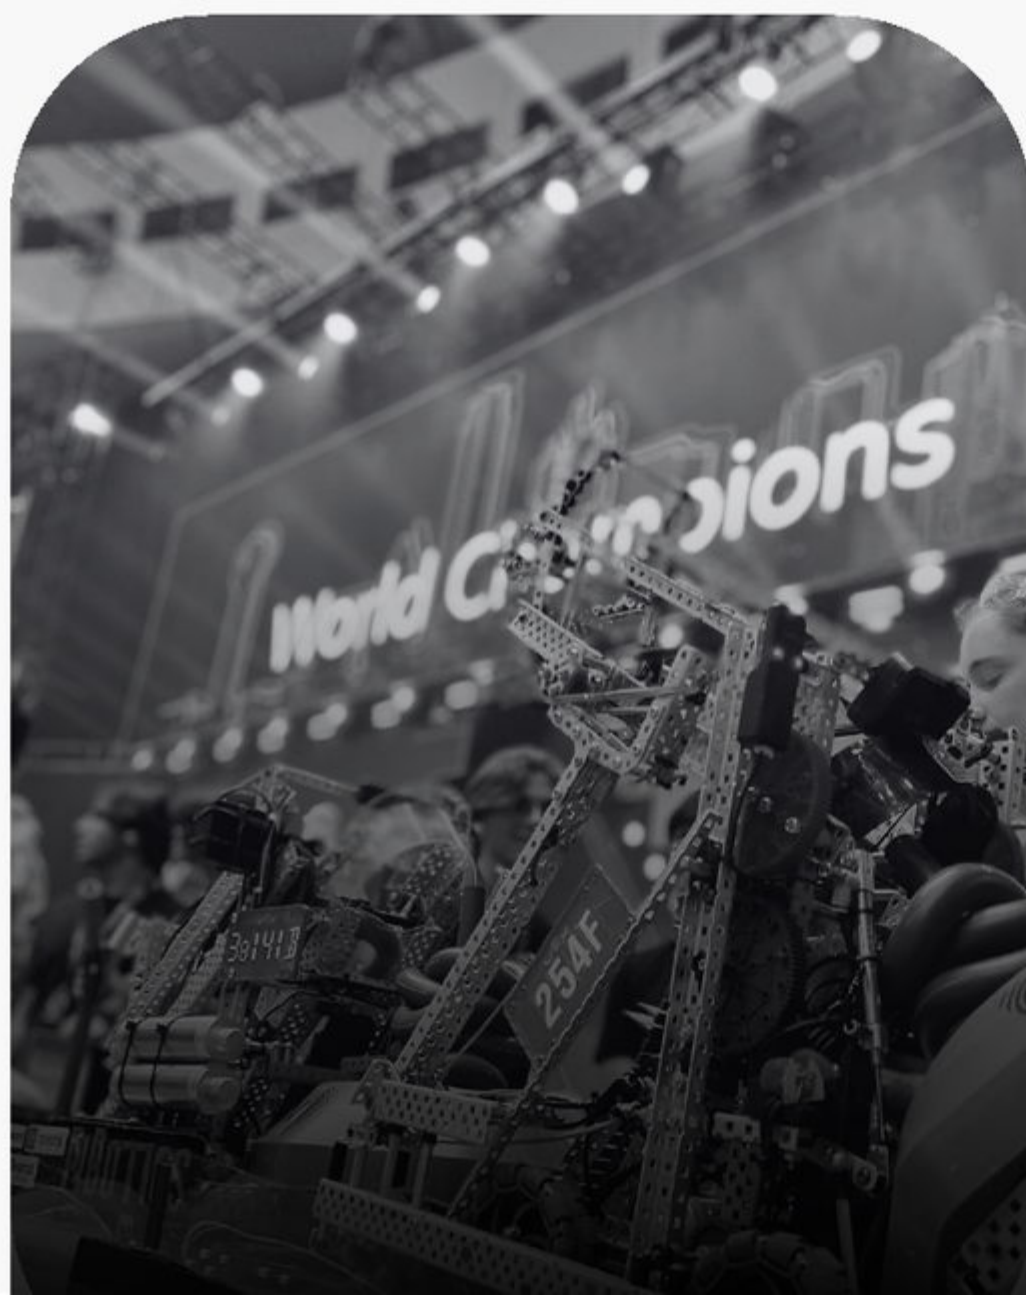

*this package comes with all the features in the previous package.

The Gold package is for sponsorships of above €2,500. It contains the following features -

- **Talks + Workshops** - As a Gold sponsor, you can host an on-campus tech talk to pitch your company and career opportunities directly to UCD's top engineering students. As well as this, our team can visit your office to demo our latest robot and present our progress to your staff.
- **Logo Placement** - As before, your logo will be placed on our team gear and at our pit at the world championships which are viewed live by 12 million people.
- **Events Package (Lite)** - This tier includes our Lite Event Package, giving you an opportunity to be at major campus events like Freshers' Week, career fairs, and exhibitions to put your brand directly in front of thousands of students and parents.
- **Handouts** - Our team will hand out stickers/merchandise from your companies at our events including the world championships.
- **Product Reviews** - Our media team will produce short-form UGC product reviews for your products that you can use for advertising.
- **Email Footers** - Your companies logo will be placed in the footer of all of our team emails.

Emerald Package

*this package comes with all the features in the previous packages.

The Emerald package is for sponsorships of above €5,000. It contains the following features -

- **Extensive Product Reviews** - Our media team will produce content targeted to promote your brand. This includes long-form ads, product reviews and short-form UGC videos for your products that you can use for advertising.
- **Video Promotion** - With the Emerald Package, your logo will be displayed in all of our videos on social media.
- **Logo Placement** - Your logo will be placed in prominent positions on our team gear, our robots and at our pit at the world championships which are viewed live by 12 million people.
- **Events Package (Pro)** - This tier includes all the features in the Events Package, giving you an opportunity to be at major campus events like Freshers' Week, career fairs, and exhibitions with stalls to put your brand directly in front of thousands of students and parents.
- **Handouts** - Our team will hand out stickers/merchandise and info booklets from your company at our events including the world championships.
- **Email Headers** - Your companies logo will be placed in the header of all of our team emails and documentation.

Diamond Package

*this package comes with all the features in the previous packages.

The Diamond package is for sponsorships of above €10,000. Should you select the Diamond Package, you become one of our primary sponsor and your needs and requests are given priority over our partners with other packages. It contains the following features -

- **Custom Requests** - Our Diamond package grants full access to all team resources. Whatever your specific needs are, we will work closely with you to accommodate any bespoke requests.
- **Employee Access to VEX** - Diamond sponsors have the option to send a representative with us to the tournament in America to watch the team compete live, provided all travel and attendance expenses are covered.
- **Prime Logo Placement** - Your logo will be placed in the most visible positions on our team gear (i.e. front and centre on our jerseys), our robots and at our pit at the world championships.
- **Interview Shoutout** - As the first-ever Irish VEX U team to reach the World Championships, we expect heavy media coverage. With this package, we will give your company direct verbal shoutouts during live interviews, putting your brand in front of 12 million live viewers and millions more watching the highlights.

Custom Package

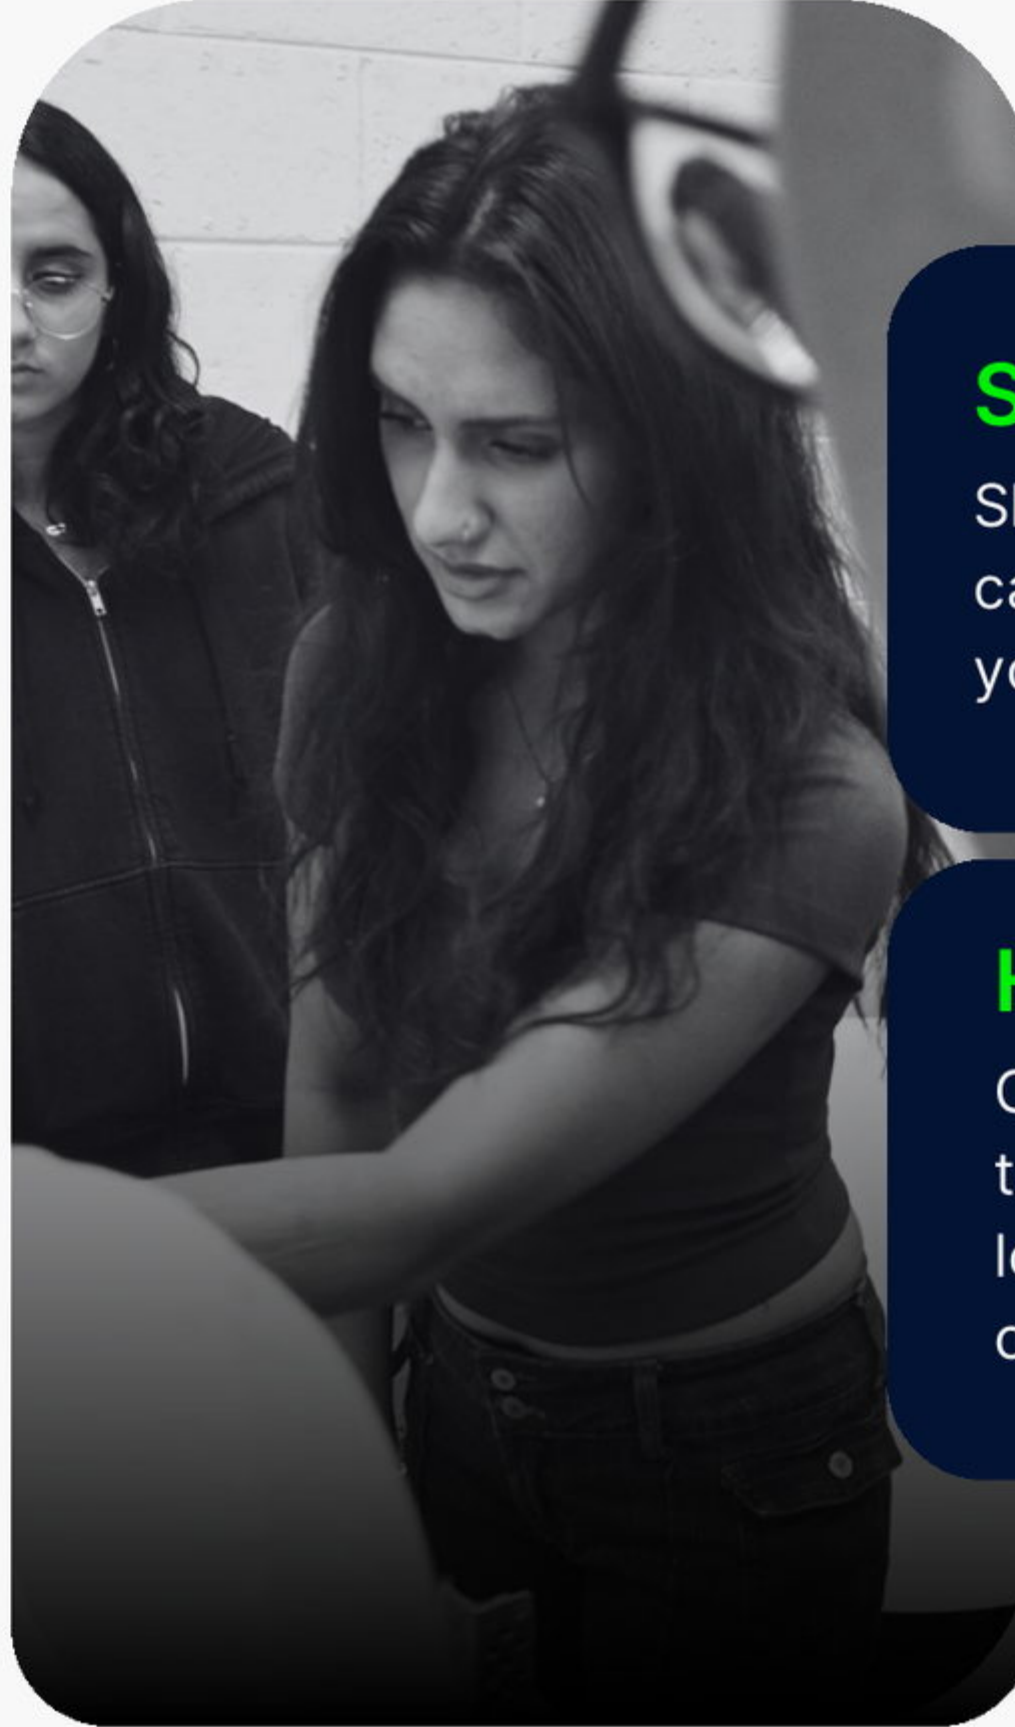

If our standard tiers don't align with your goals, we can build a bespoke partnership. We highly value in-kind support where you provide products or services instead of direct funding in exchange for targeted brand exposure. Custom options include -

- **In-Kind Product & Equipment:** Supplying your company's products or tools for free (e.g., electronic components, hardware, or materials to build our robots).
- **Logistics & Travel Support:** Providing food for team build sessions, covering flights to the World Championships, or manufacturing our team apparel.
- **Sub-Team Branding:** Earning naming rights for specific divisions (e.g., our software or design teams) featured as "Powered By [Your Company]."
- **Service & Skill Exchanges:** Trading specialized manufacturing (like CNC machining), software licenses, or technical services for campus marketing and recruitment access.

Other Ways To Support

Spread the Word

Share our team's milestones, crowdfunding campaigns, or competition updates on your company's social media channels.

Host an Office Visit

Open your doors for a company site tour, giving our members a firsthand look at your workplace and industry operations.

Thank You!

Thank you so much for your time and for considering supporting our team. It really means a lot to us, and your backing is what makes it possible for us to represent Ireland on the world stage.
