

UCD ELECSOC
PARTNERSHIP PROPOSAL

Dublin Micromouse Open 2026

Three ways to partner. One competition to put
your name on.

Ireland is full of talented makers who are forced to go abroad to challenge themselves and compete with likeminded people.

As UCD ElecSoc, Ireland's most active engineering society, we want to change that.

So we are building the competition here: a national Micromouse Open in Dublin, held to the same standard of build, speed and rigour they would fly to Birmingham or Taipei for.

A Year of Momentum

From weekly MakerLabs to UCD's largest student robotics showcase, built by students, in one academic year.

500+

ACTIVE MEMBERS

70+

EVENTS A YEAR

3.1k

SOCIAL FOLLOWERS

6

MAKERLABS RUN

180+

ROBOEXPO ATTENDEES

Four Student Robotics Projects

Each one designed, built and debugged by undergraduates across the year.

Robot Spider

24 servos and an FPV camera, driven from a single joystick.

BUILT BY KELVIN GAO

Sand Art Machine

Draws real art in sand, with a pop-out arm to retrieve the ball.

BUILT BY LIAM O'SULLIVAN

Desktop Jarvis

A rover running a local LLM, it talks, reacts and dances.

BUILT BY MIKE CHEN

Analogue Drum Machine

Kick, snare and 12-inch subs on custom analogue PCBs.

BUILT BY CIAN BRADY

03 • HOW WE TEACH

Building Practical Engineers

Six MakerLabs across the year turn curiosity into working circuits, firmware and prototypes, soldering irons, sensors, laptops, and a room full of people helping each other.

6

MAKERLABS DELIVERED

500+

MEMBERS TO DRAW ON

04 • COMPETITION, ALREADY PROVEN

Our First Makerthon

Five hours, one room, teams shipping working builds from a standing start.

SAND ART MACHINE

Eight More Builds, Every One Student-Made

Beyond our own officers' projects, students brought their own work to RoboExpo and demoed it themselves.

Demoers at RoboExpo 26', student-owned projects, exhibited and explained by their builders.

Companies, Teams and the Wider Ecosystem

We can put students, competitive technical teams and industry in the same room, and keep them there.

- Manna
- Infineon
- GaelForce UCD
- UCD UAV
- EirSpace
- Patch
- Lovable

Participants and guests across ElecSoc events 2025/26. Not Micromouse sponsors.

10 • WHY IT WORKS

Students Explaining Their Own Engineering

Live questions, real hardware, no scripts. A competition sharpens all of it.

We Already Know How to Make Prizes Matter

At RoboExpo, we gave away a Bambu Lab A1 mini.

For Micromouse, we want to make the winning moment even bigger.

DUBLIN

MICROMOUSE OPEN 2026

BUILD IT. CODE IT. RACE IT.

We built the community. We proved we can deliver.
Now we are launching our most ambitious robotics
competition yet.

DATE	VENUE	EXPECTED TEAMS
TBC	TBC	25+

How Micromouse Works

Teams build a palm-sized autonomous robot that maps an unknown maze on its own, then races its fastest route to the centre.

01

Design

Chassis, motors, sensor layout.

02

Build

Solder, print, assemble, rebuild.

03

Program

Maze-solving and motor control.

04

Test

Tune until the runs repeat.

05

Race

Unknown maze, live crowd, clock running.

06

Win

The moment your prize creates.

Three Ways to Partner

Three tiers, running together. Tier 01 is the headline sponsor and carries the largest presence on every surface.

01 • HEADLINE SPONSOR

FIRST COME, FIRST SERVED

Presenting Event Partner

€1,200+

CASH, OR CASH AND PRODUCT

TOP OF THE HIERARCHY

Naming rights, the largest logo on every poster and on the awards backdrop, plus a mention in every major announcement.

YOU OWN THE HEADLINE

The competition name, the campaign, the opening and closing, and a place presenting an award.

Premium stand, priority media, category exclusivity.

02 • 1 COMPANY

Official Prize Partner

€500–1,000

CASH OR AGREED PRODUCTS

WHERE IT GOES

100% ring-fenced for the prize pool. Nothing else touches it.

YOU OWN

The prize pool, the prize graphics and every winner announcement that follows.

03 • UP TO 3 COMPANIES

Official Technical Partner

€200–500

EACH, OR COMPONENTS IN KIND

WHERE IT GOES

Sensors, motors, batteries, PCBs, filament, tools and printing.

YOU OWN

One technical category, real product use, in students' hands.

Core Partnership Benefits

Available across the partnership tiers. Higher tiers receive a more prominent version of each one, and naming rights sit with the Presenting Partner.

01

Official partner recognition

Named as an official partner of the competition, at your tier.

02

Tier-appropriate branding

Logo placement across event material, scaled to your tier.

03

Awards recognition

Acknowledged at the awards, in front of the room.

04

Social and LinkedIn coverage

Across a 3.1k-follower engineering audience.

05

Reusable event photography

Photo and video you can use in your own channels.

06

Student engagement

Time with the people building robotics in Ireland next.

07

Optional exhibition space

A table or activation on the day, where appropriate.

08

A place at Ireland's biggest student build

Presence at a national university engineering competition.

Help us reward Ireland's next generation of robotics talent.

Partner with the Dublin Micromouse Open 2026 · presenting,
prize or technical.
