

Albin Andrews Joby

ENGINEERING STUDENT · ROBOTICS & EMBEDDED SYSTEMS

albin.andrewsjoby@ucdconnect.ie
089 241 9841
Dublin, Ireland

First-year Engineering student at UCD who spends most of the free time building robots. Robotics Officer at UCD ElecSoc, co-founded Ireland's first VEX U robotics team, and founded Cubi, a small NFC hardware startup. Right now I'm organising the Dublin Micromouse Open 2026. Interested in autonomous systems and embedded engineering.

ENGINEERING EXPERIENCE & LEADERSHIP

Robotics Officer / UCD ElecSoc

APR 2026 – PRESENT

- Set the technical direction for ElecSoc's robotics programme and run its robotics initiatives.
- Organise [hardware workshops](#) and technical events so students get hands-on time with tools they wouldn't otherwise touch.
- Founded Hack Club 2026 to guide UCD teams into external hackathons and engineering challenges, giving students who want to compete the resources and support to form teams — the way I set up GaelForce UCD, Ireland's first VEX U team.

Founder & Organiser / Dublin Micromouse Open 2026

IN PROGRESS

- Organising the Dublin Micromouse Open 2026, hosted by UCD ElecSoc.
- Wrote the competition format and technical rules, and set up event operations.
- Contacted engineering companies directly to secure [sponsorship](#), industry partnerships and prize support.
- Handling branding, marketing, the website and getting participants signed up.

Co-Founder, Mechanical / [GaelForce UCD](#)

2025 – PRESENT

- Co-founded Ireland's first VEX U robotics team.
- Design and build the mechanical side of our competition robot: CAD, 3D printing, prototyping, testing until it holds up.
- Work with mechanical, electrical, electronics and software teammates through the whole build cycle.
- Contacted engineering companies to secure [sponsorship](#); helped write technical docs and run tests.

Founder / [Cubi](#)

2025 – PRESENT

- Founded Cubi, a custom NFC hardware product; designed the housing in CAD and 3D printed it myself.
- Built a web configurator so customers can personalise the hardware before ordering.
- Run manufacturing, branding and the business side; use Claude Code to speed up firmware work and prototyping.

Workshop Organiser / [MakerLabs Initiative](#)

2025 – PRESENT

- Plan and run hands-on workshops in electronics, robotics and rapid prototyping.
- Write the workshop material and demos, and help beginners get unstuck.

Co-Host & Organiser / [Robo Expo](#)

2026

- Co-hosted a robotics exhibition at UCD: logistics, live demos and student project showcases.
- Helped get more students across campus interested in robotics.

Member / [UCD Robotics Club](#) 2025 – Present — building two robotics projects on the side, working with PCB design, CAD and embedded programming.

Sales Assistant / [Gala, Collins Avenue](#) — customer service, cash handling and store operations; rehired across three periods, 2024–2026.

EDUCATION

University College Dublin

Engineering, First Year · Sep 2025 – Present

St Aidan's CBS, Dublin 9

Leaving Certificate, 589 points · 2025

Vice-Chairman, Green Schools Committee — led the school to its first Green Flag for Global Citizenship & Energy.

TECHNICAL SKILLS

ENGINEERING

Robotics · Embedded Systems · Mechanical Design · CAD (Fusion 360, Onshape) · PCB Design · Rapid Prototyping · 3D Printing · Electronics · Sensors · Product Development · Manufacturing · CNC

SOFTWARE

C · Python · MATLAB · Git & GitHub · Firebase · Web Development · AI-assisted Development (Claude Code) · VS Code · Bambu Studio

LEADERSHIP

Robotics Officer — UCD ElecSoc
Co-Founder — GaelForce UCD
Founder — Cubi
Organiser — Dublin Micromouse Open 2026
Co-Host — Robo Expo
Workshop Organiser — MakerLabs

INTERESTS

Autonomous systems · Applied AI · 3D printing · Gym
